

# BUSINESS CASE CALCULATOR for the “Return On Learning”

## Demonstrate the ROI of your HR and OD measures investment with convincing data and appealing graphics

### What is Business Case Calculator and where do we use it?

Business Case Calculator is your digital assistant for creating a business plan for your HR and OD projects. The instrument enables you to place all available facts and figures into the right context and provides you with useful statistics and important metrics to support and solidify your investment proposal for your HR/OD initiatives

### How does it work?

Business Case Calculator analyzes the information you provide in the 4 pre-set data requesting areas, including Investment Description, General Information, Expected Benefit, Investment Values. The tool calculates the break-even and the return on investment of “soft” HR/OD measures and helps you justify the project costs before the management or the financial department.

### Challenges for the organization, team leaders and the employees

#### Challenge

#### Our solution

Pull back on HR/OD investments in times of crisis not supported by ROI data

The tool provides a cost estimate of the total investment, the ROI, and the price the company will pay if it does nothing

Prioritizing projects and resources often neglecting the HR/OD ones as not critical for the success of the organization

Identifies all the key metrics necessary for proving the level of importance and cost efficiency of your HR/OD project

Difficulties in defending the return-on-investment values of a given HR/OD project

Provides more profound insight into metrics that can improve decision-making regarding investments in HR/OD measures
